

4 Seasons of TOTAL FUNCTIONALITY

Nobody does it like John Deere...

...and that's a fact! John Deere is the last remaining American-owned and American-based compact tractor manufacturer in the world. This gives John Deere an enormous advantage over other manufacturers. When John Deere designs a tractor, it's manufactured from the very start to be a machine perfectly built for the United States tractor buyer!

What does this mean? It means that a John Deere tractor is built to seamlessly go hand-in-hand with attachments and implements the United States buyer needs. This creates ideal performance and allows for unmatched ease and simplicity when changing implements.

American ingenuity is the difference! Other tractors that originate from foreign countries such as China, Korea, Japan, and India are built to be a match for their markets, which rarely includes mid-mount mowers, front snow blowers, backhoes, or even loaders. These tractors are then sent to the United States where these implements are essentially an afterthought for marketability in the United States.

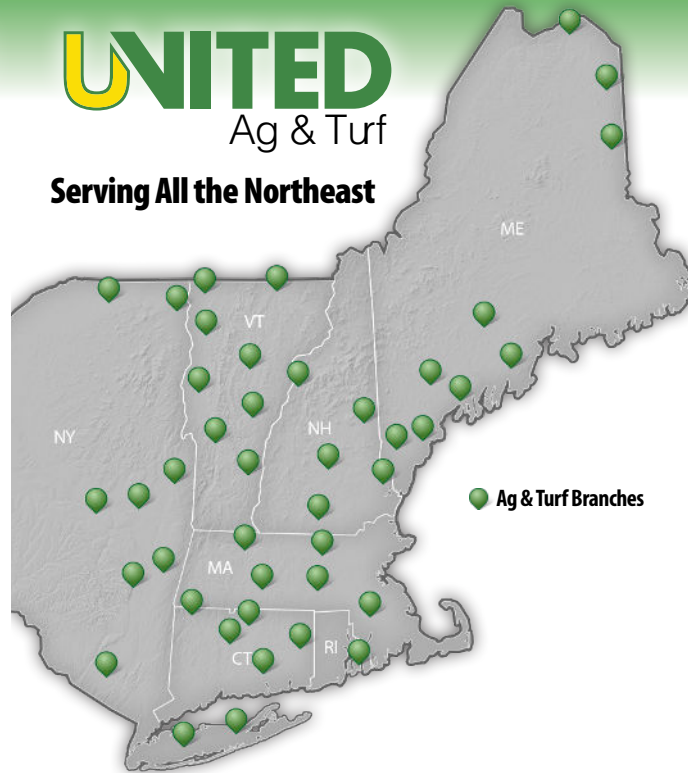

An upper hand 24/7/365. John Deere tractors are designed to be utilized in all four seasons. From snow to ice, dirt to gravel, lawn to field, to lifting and digging, John Deere tractors are built for total functionality. This is one of the many elements that separates John Deere from all the rest!

UNITED

Ag & Turf

Serving All the Northeast

● Ag & Turf Branches

We chose the name United Ag & Turf to reflect that our company is about more than one individual. At United Ag & Turf we believe that we have a united team of employees that are dedicated to serve and support customers in all market segments. **We believe that United we are strong, stable & dependable.**

We are thankful for the partnership with you and the communities surrounding us. We strive to be your trusted equipment provider.

3 - SERIES

Mid Frame Compacts

3D HD VALUE SERIES

3E HD VALUE SERIES

3R HD PREMIUM SERIES

3R HD CAB SERIES

LOADER

In addition to monumental lifting capacity and breakout force, the 300E & 320R HD loaders both feature nickel plated cylinders to resist corrosion, side touch grease fittings, and has the industry's only quick attach bucket system that doesn't reduce your lifting capacity! The 320R, standard on our 3R Series, also have the Quick-Park mounting system that allows for foolproof removal without a single tool, in under two minutes without breaking a sweat!

BACKHOE

The 3-Series offers three different models of backhoe to accommodate the 3E and 3R lineups. Removal is completely toolless to allow for easy implement changes. Designed to be paired with the tractor for perfection, digging power has been pushed to the limits!

SNOW REMOVAL

Nobody does snow blowers quite like John Deere! The 3R Series tractors from earliest development were designed to be paired with front mount snow blowers. From the easy on/off of quick hitches, to advancements in driveline technology, to standard options like hydraulic chute rotation, skid shoes, drift cutters, performance lies with John Deere!

FRONTIER

The Frontier implement company was created to compliment the John Deere line of tractors shortly after the turn of the century. Offering a full line of rear snow blowers, rotary cutters, landscape rakes, box scrapers, post hole diggers, tillers, pallet forks, grapples and more, all in multiple grades to match the task at hand!

TIRE OPTIONS

R4 Industrial

- Designed for all around use
- HD lug design
- Wears well on hard surfaces

R3 Turf

- Designed for lowest impact on turf
- Bi-Directional tread design
- Very good snow traction

R1 Ag

- Deep lugs, best traction in mud/gravel
- Not turf friendly
- Doesn't wear well on hard surfaces

R3 Galaxy Turf *Special Orders Only*

- Offers high flotation, very little traction
- Least turf disturbance, shallow tread depth
- Generally for golf course application
